## Dicember 2023

### Travellers' daily average (month)

Working day  
**37,6 millions**  
**75% of the total**

Non-Working day  
**35,0 millions**  
**70% of the total**

### Extra-urban travellers's modal split

The selection of a specific mode of transport was made by analyzing the type of cell crossed by each traveller. Cells's positions corresponding to railway stations and airports are known and the mode attribution is made by an algorithm that analyzes the sequence of the types of cells crossed and associates each movement with the train, plane or other mode (road or ship) following logical rules.

### Mobility rate by day of the week
